

## CH80 Heatsink

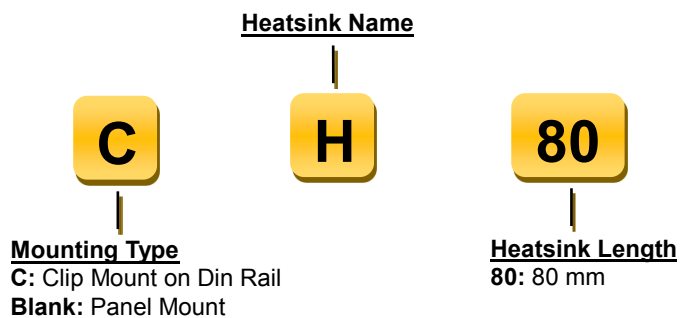

- Vertical Fin Design Increases Air Circulation
- Suitable for SAP Series Solid State Relays
- Din Rail Mounting

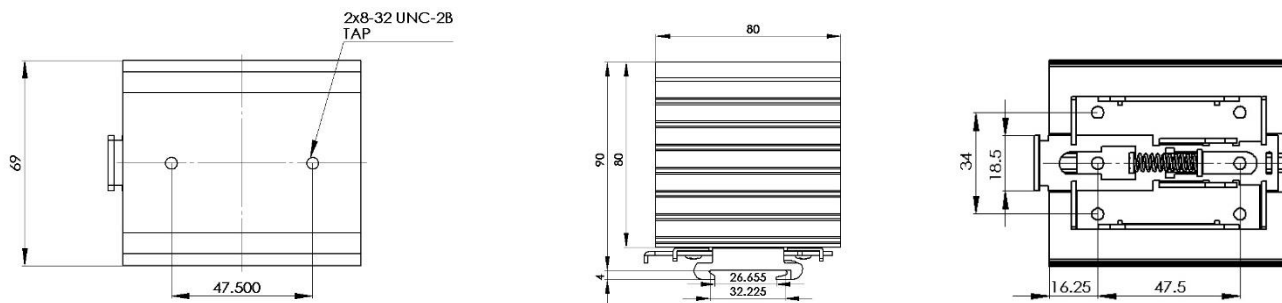

### GENERAL SPECIFICATIONS

| Description                                        | 80 mm            |
|----------------------------------------------------|------------------|
| Model Number                                       | CH80             |
| Thermal resistance [ $^{\circ}\text{C}/\text{W}$ ] | 1.2              |
| Heat sink mounting                                 | Din Rail         |
| Weight [grs]                                       | 557              |
| Material                                           | Aluminum         |
| Finish                                             | Black Anodized   |
| SSR Mounting Holes/Threads                         | 2/4-12 or 2/4-14 |
| Assemble type of relay                             | 1*SAP Series SSR |
| Mounting screw torque [in nm]                      | 2.9              |
| Fan size [mm]                                      | N/A              |
